

# OSAMA GHAFOOR

Entry-Level AI Engineer | Agentic AI & Automation Foundation

+92-333-5333465 | +92-303-5333465 | osamag13@gmail.com | Pakistan | [www.linkedin.com/in/osama-ghafoor-b87346a1](https://www.linkedin.com/in/osama-ghafoor-b87346a1)

## PROFILE SUMMARY

Career-transitioning technology professional moving from eight years of structured administrative and compliance-focused work (federal government and private sector) into AI/Agentic AI engineering. Holds an EduQual RQF Level 6 Diploma in AI Operations (AIOps) covering Python, Linux, DevOps, Docker, Kubernetes, and cloud fundamentals, applied through a capstone drone-swarm coordination project and hands-on labs. Currently building applied Agentic AI skills at Panaversity (Agent Factory) and pursuing Microsoft Certified: Azure AI Fundamentals (Exam AI-901). Brings strong documentation discipline, process accuracy, and reliability from prior compliance and reporting roles — qualities directly transferable to building dependable, well-tested AI systems.

## TECHNICAL SKILLS

|                       |                                                                                                                                                     |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Programming & Data    | Python, Pandas, NumPy, data cleaning & transformation                                                                                               |
| AI / Agentic AI       | ML & DL fundamentals, Agentic AI concepts,                                                                                                          |
| Automation & DevOps   | Linux, Bash, Cron, Github, CI/CD, Docker                                                                                                            |
| Cloud & Orchestration | Azure (Auto ML, Foundry, Model Deployment), AWS (EC2, IAM, VPC), Kubernetes fundamentals, Terraform basics                                          |
| Familiar Tools        | PostgreSQL, MySQL, SQL fundamentals, REST API integration, FastAPI, Airflow, ClickHouse, Ansible, Jira, Nginx, ROS2/MAVLink (robotics lab exposure) |

## PROJECTS

### Autonomous Drone Swarm Coordination Platform — AIOps Diploma Capstone

- Designed a 3–5 drone swarm coordination simulation using ROS2 + DDS pub/sub, integrating ArduPilot/MAVLink telemetry flow.
- Explored formation control and consensus logic for multi-agent coordination, plus OpenCV-based detection concepts.

### Automated Multi-Database Crypto Data Pipeline — Personal Project

- Built an ETL pipeline pulling crypto data via REST APIs, processed with Pandas, and loaded into PostgreSQL and ClickHouse for OLTP/OLAP separation.
- Automated ingestion with Apache Airflow DAGs and exposed processed data through a FastAPI service.

### Data Analysis Project — World Quant University

- Performed cleaning, correlation analysis, and visualization (histograms, scatter, bar charts) on real-world datasets to derive insights.

## TECHNICAL EXPERIENCE

### Technical Internship — AI, Automation & DevOps — Al-Razzaq Labs (Remote – Al-Nafi)

- Built Python automation scripts for file handling, validation, and logging on Linux; scheduled routine jobs with cron.
- Created Docker images and multi-service Docker Compose setups; managed source control and PR workflow with Git.
- Set up CI/CD pipelines for build and deployment practice; performed data preprocessing and basic model training with Pandas/Matplotlib.

## CERTIFICATIONS & EDUCATION

### Diploma in Artificial Intelligence Operations (AIOps) — Al-Nafi International College — EduQual UK, RQF Level 6, 360 Credits

Completed

- AI/ML foundations, Python, Bash & Linux, DevOps, Docker, Kubernetes, automation, cybersecurity concepts.

### Agentic AI & OpenAI Development — Panaversity — Agent Factory

In Progress

### Microsoft Certified: Azure AI Fundamentals (Exam AI-901) — Microsoft

In Progress — expected 31 Jul 2026

**Deep Learning Foundations** — Coursera

*Completed*

- Neural networks, activation & loss functions, and core training concepts.

**Master of Computer Science (MCS) — 16 Years Education** — Virtual University of Pakistan

*2020 – 2023*

**Bachelor of Arts (BA) — 14 Years Education** — Punjab University, Lahore

## PROFESSIONAL EXPERIENCE

---

**Upper Division Clerk (BPS-13)** — Federal Government of Pakistan

*Mar 2019 – Present*

- Manage scholarship and examination workflows requiring strict compliance, documentation accuracy, and reporting control.
- Perform record verification and multi-step coordination — direct experience in process discipline relevant to reliable system operations.

**Accounts & Administration Executive** — Private Sector

*3–4 Years*

- Prepared reconciliations and structured reports; coordinated cross-functional processes through systematic validation.

**E-Commerce Business Owner (Private Label)** — Amazon & eBay

*4 Years*

- Managed end-to-end marketplace operations — listings, inventory, order lifecycle — analyzed sales trends via dashboards.

## STRENGTHS & INTERESTS

---

**Strengths:** Analytical thinking, documentation discipline, learning agility, process compliance, reliability mindset.

**Languages:** English, Urdu.

**Interests:** Automation, Agentic AI, Cloud Systems, AI/ML, Robotics.
